## SUMMARY

Senior Computer Science student at King Saud University with a strong foundation in Artificial Intelligence, Data Analytics, and Business Intelligence. Proficient in building solutions with machine learning and statistical models, developing software, and designing Power BI reports and dashboards that transform raw data into actionable insights, bridging the gap between data models and business needs. Seeking an internship to apply analytical and problem-solving skills to real-world challenges.

## EDUCATION

**King Saud University (KSU)**  
*Bachelor of Science in Computer Science* | **GPA: 4.85/5.0**

Riyadh, Saudi Arabia  
*Expected 2026*

## FEATURED PROJECTS

### Eventia (Graduation Project)

A centralized, role-based digital transformation solution that covers the entire event lifecycle across multiple perspectives: Organizer, Attendee, Vendor and Admin. Built with Django and MySQL, featuring a Gemini-powered AI assistant, SCEGA licensing workflows, in-app messaging, and analytics dashboards.

### Commercial Flights Delays Analysis

Business Intelligence and Predictive Analytics solution analyzing commercial flight delays, leveraging advanced Power BI machine learning capabilities including linear regression, clustering, time-series forecasting, and anomaly detection to optimize operational logistics and predict delay probabilities.

### Optimizing Donors Outreach

Supervised Machine Learning project that identifies the most likely charity donors through extensive EDA and cross-validation techniques, benchmarking multiple classifiers to select the optimal model and minimize outreach costs.

### SMS Spam Classifier

A NLP spam-detection model classifying SMS messages as spam or ham using Multinomial Naive Bayes on text features, evaluated on precision, recall, and F1.

### Boolean Search Engine

A high-performance Boolean search engine built on an inverted index, supporting AND/OR query operators. Tested on a corpus of over 200K news articles, achieving microsecond-level retrieval times.

## SKILLS

- **Programming Languages:** Python, Java, C, SQL, CUDA, HTML, CSS, JavaScript
- **Data Science & BI:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Optimization, Exploratory Data Analysis (EDA), Predictive Analytics, Data Visualization, scikit-learn, PyTorch, pandas, NumPy, Matplotlib
- **Tools:** Power BI, MySQL, Git/GitHub, Jupyter Notebook, MS Office, VS Code, Claude Code
- **Soft Skills:** Problem-Solving, Time Management, Teamwork, Continuous Learning
